

Course Dreamweaver I (2012-2013)

Code / Version DMED1060 (100)

Total Hours 36

Credits 3

PreRequisite(s)

CoRequisite(s)

Course Description

This course will cover Web page construction and organization with Dreamweaver, a visual Web page editor. Students will go through the Web page creation process from start to finish, with emphasis on Dreamweaver's tools for enhancing work flow and efficiency. Topics covered include: design consideration, file organization, interactive forms, formatting with cascading style sheets, templates, and using frames.

PLAR Eligible: Yes

Course Outcomes

Successful completion of this course will enable the student to:

1. Navigate and organize files using the Dreamweaver interface.
 2. Create Web site files and structure using site tools.
 3. Build Web page layouts with tables and layers.
 4. Use frames to enhance Web site navigation.
 5. Add JavaScript to Web pages to enhance interactivity.
 6. Format Web page content using cascading style sheets.
 7. Enhance page building and updates by using templates.
 8. Upload a Web site to the World Wide Web.
-
